

## Language Services with Global Reach

Science Applications International Corporation (SAIC) is one of the largest providers of language services to the intelligence, defense and law enforcement communities. With a portfolio of more than 70 languages, our linguists provide translation, interpretation and analysis services to U.S. government decision-makers at home and abroad.

Our linguists are almost exclusively native speakers who hold close ties to the region, and understand the people, the culture and the societal structures that influence events around the globe. Many of our personnel hold advanced degrees, possess security clearances, can deploy overseas at a moment's notice and are accustomed to working in culturally diverse regions overseas. Their skill sets range from direct translation of electronic and print media to consecutive and simultaneous translation and analysis.

From the courtroom to the combat theater, our language service professionals work in concert with analysts and decision-makers, and are often embedded in a forward-deployed environment such as Afghanistan or Iraq. As native speakers, they can rapidly sift through reams of data, to identify and extract potentially dangerous and time-sensitive information before it can be transformed into another terrifying news headline.

From the courtroom to the combat theater, our language service professionals work in concert with analysts and decision-makers, and are often embedded in a forward-deployed environment.

## A Commitment to Excellence

SAIC provides accurate translation services by using a workflow management process developed through serving military forces in Iraq and Afghanistan as well as federal law enforcement agencies in Washington, D.C. We are attuned to our customer's mission and needs, and can draw from SAIC's vast resources and capabilities to provide a complete understanding of our client requirements and processes. And, our fully-cleared recruiters have forged relationships with many foreign language communities across the United States.

## Wide-Ranging Expertise

Our expert workforce is proficient in more than 70 languages, including low-density languages and dialects. Our employees are fully aware of the intelligence community mission and culture.

Our linguistic capabilities are augmented by these specialized services:

- Professional management of a diverse workforce, with consideration for cultural sensitivities and customs.
- Ability to assure continuity of operations in changing mission requirements or surge scenarios.
- A turnkey suite of capabilities that enhance the particular requirements of the intelligence community environment.
- Effective workflow management combined with quality control best practices and software tools to increase productivity and establish an organized approach to assignments.
